

Peek at the Week Year Two

Week beginning Monday 14th September 2020

We are settling into our new routine at school and the children have adapted well to our new timetable and our 'bubble' distancing rules. Homework will begin this week. Please send the homework book in on Mondays and the spelling homework on Fridays. We are looking forward to contacting you by telephone for an informal chat over the next couple of weeks.

The Year Two team

This week we will be covering the following:

Maths: Unit – Place Value (Year 2 up to 100 but differentiated for some children who may find this too difficult.)

After recapping some Year 1 skills last week, we are now beginning Year 2 place value work.

- Read and write numbers to at least 100 in numerals and in words.
- Recognise the place value of each digit in a two-digit number (tens, ones)

Identify, represent and estimate numbers using different representations including the number line

English: Week 2 of work based on a book by Oliver Jeffers called 'Here We Are: Notes For Living On Planet Earth'. The unit has been produced to help support all children returning to the school community, re-connect with each other and re-engage with school life. The words and pictures in the book work together to help children to understand their place in the world and to move forward together in a positive and constructive way post lock down.

Topic

History: Local area. To plan some some new amenities for Bagshot village. Draw a simple map to show the new features and construct a key.

Art: Artis study: Picasso- drawing in the style of this famous artist.

P.E.: Multi skills – Ball skills (hand-eye coordination)

P.S.H.E. – Week 2 Stories for well – being (Six week unit)

We will be using carefully chosen stories to develop the children's wellbeing alongside their literacy skills. Characters in the books are experiencing various issues: Transition; Happiness; Empathy; Worries; Resilience and Friendship. We will be using the books to stimulate discussion, and to allow the children to express their feelings.

Science: Unit – Animals including humans

The life cycle of a butterfly.

Having looked at life cycles of humans last week, we will learn about the lifecycle of a creature whose offspring do not look like the adults.
